To Whom It May Concern,

This letter is to recommend Hugo Urías based on his exceptional contributions to our community through his impressive coding projects and as a volunteer community moderator and Replit Rep.

Since I began working at Replit, Hugo has always been a standout community member, building and sharing his coding projects on our site and in hackathons. Hugo is a prolific creator and has built a range of projects that display his varied skillset across web development and design. Much of his work is built in service of other Replit users. Some of his most notable creations are his [Dark Rainbow Theme](#) - which has been adopted by over 60,000 users to augment the color of their coding workspace, and his [Python HTTP Server](#) which helps users get a jump start on building their Python projects and has been run over 15,000 times. Lastly, his Replit Auth Template was so helpful to our community that it is now listed as [an official Replit resource](#).

We were so impressed with the strength of Hugo's work and his emotionally intelligent demeanor that we invited him to become a Replit Rep, and later, as a mentor to other Reps. As a Replit Rep, he conducted outreach to support other community members through virtual events, tutorials, and coding templates. Hugo is now a volunteer Community Moderator, where he works with our Trust and Safety and Marketing teams to keep our site and user forum safe, helpful, and kind. As a Mod and overall community leader, he has consistently shared his knowledge and expertise by writing various guides in our forum and reporting bugs and feedback to our team, contributing to the improvement and stability of our platforms.

Hugo is a truly special person who is equally dedicated to improving and exploring his own skills and to helping others reach their full potential as well. I am confident that Hugo will continue to excel and make significant contributions wherever his career path may lead him.

Sincerely,

A handwritten signature in black ink that reads "Amjad Masad".
